

# PHOTOGRAPHY SUMMER WORK

Using the theme  
*Shapes, Textures & Patterns*  
take at least 100 photos

If you have a camera you can of course use that but if you don't it's perfectly fine for you to use your phone for the summer shoot.

When the course starts properly you will have to be shooting on a DSLR (which can be loaned from college if you don't have one).

A Few tips ...

- **Fill the frame with what you like** – what is your photo about? (get rid of everything else)
- **Think about angles** – take your time when composing your images
- **Think opposite** – can you make your photo different from everyone else's? What the most common place to take the shot? Do the opposite.
- **Lighting** – Photography literally means light painting – always think about the light
- **Framing** – put things in the frame to create a mood or a story

Happy shooting.
