

To access the internet at home on a school laptop:

1. **Open Start > Control Panel > Internet Options > Connections > LAN Settings > Untick the option to use a proxy server**
2. **Connect to your home router**

To use MV16 resources, launch **Internet Explorer** and navigate to the VLE home page.

From the top menu, select '**Remote Apps**'. You may be required to sign in (use your full email address and school password) or click accept to approve the connection to our server. Once successfully connected, you will see this page:

## Access your files

Use 'Explorer' to see network shares including your N drive. Click the icon to launch then 'Connect' and log in using your school email address and password. Click yes or accept to windows that may pop up asking for your approval to connect.

## Programs

Click the desired icon to launch. SIMS will require you to log in with your usual SIMS username and password, exactly as you would in school.
